

Guatemala, October 31, 2024

In response to recent incidents of violence and human rights violations at Finca La Perla, located in Chajul, Quiche, the USG-BC strongly condemns:

- **All acts of violence** by armed groups targeting peaceful workers, farmers, and executives in a productive agro-industrial enterprise. Our thoughts are with the victims and their families during this difficult time.
- **Human rights violations against workers, farmers, and executives**, as these actions threaten the integrity, security, and property rights of individuals and businesses.

We call on all local and national authorities to thoroughly investigate this incident and ensure that those responsible are brought to justice.

Life, liberty, and property are fundamental human rights that must be respected and safeguarded. Only by upholding these rights can we continue to foster solidarity and maintain a stable environment for social development and economic growth in Guatemala.
